NEEDLE HOLDERS TUNGSTEN CARBIDE

The Needle Holders shown on pages 26-28 have jaws made from Tungsten Carbide, which is the hardest and longest lasting material used in Surgical Instruments. The configuration of the jaws gives the best possible grip, and the gold bows allow clear and positive identification in the operating theater.

SCISSORS ULTRA CUTTING

- The Ultra Cut Scissors are design to give an effortless cutting action through the full length of the blade.
- The bottom blades are ground to a razor edge suitable for all materials from fine tissue to coarse bandages.
- The serrated top blades prevent tissue slippage ensuring minimal damage.
- A durable black coating on the handles allows easy recognitions.
